

MFD1 Vanluk Shelf Divider

A solution designed for organising your files and documents on an existing filing system with our new dividers.

The Vanluk designed **steel Shelf Divider**, the MDF 1, can be used for organising files and documents simply and easily.

Our product suits **Codafile's** desk organiser and cabinet products and is unobtrusive in a **black satin powder coated finish** with smooth rounded edges.

The Vanluk Shelf Divider manufactured from **steel for strength and durability**. Field trials have shown the Vanluk Shelf divider is **superior to plastic equivalents**. Plastic dividers tend to break at the tabs and distort.

If you would like to order our steel Vanluk Shelf Divider please go to:
